ABOUT ME

I'm currently a Ph.D student in Computer Science Department of University of California, Santa Barbara supervised by William Wang and Xifeng Yan. My research interests lie in natural language processing and deep learning. Primarily, I work on natural language processing under structured or semi-structured data like tables [21,20,18,15], KB [22,17,4], etc. I'm mainly interested in tasks like question answering [21,19], text generation [22,20,18,11], fact-checking [16,15] and other related understanding tasks [10,7]. Besides, I'm also interested in variational inference [12,8,4], multi-modality problems [19,16,5,2], and machine translation [6,3,1], etc. My research goal is to bring together free-form textual knowledge and structured symbolic knowledge to build the new-generation AI system which can bridge the gap between two worlds.
