ABOUT ME

I'm currently a Ph.D student in Computer Science Department of University of California, Santa Barbara supervised by William Wang and Xifeng Yan. My research interests lie in natural language processing and deep learning. Primarily, I work on natural language processing under structured data, like symbolic reasoning [4,14,15,16], dialog system [7,11]. Besides, I'm also interested in variational inference [4, 8,12], multi-modality problems like captioning, question answering, inference [2,5,16,17], and machine translation [1,3,6], etc. My research goal is to bring together free-form linguistic reasoning and structured symbolic reasoning to build the new-generation of AI system.
